## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - A. Claims 1-2 and 12-18, drawn to a method for performing a transfer of a utility's customer base, classified in class 705, subclass 1.
  - B. Claims 3-10, drawn to a system for conducting e-commerce, classified in class 709, subclass 217.
  - C. Claims 11, drawn to a method for accessing customer-related information, classified in class 707, subclass 104.1.
- 2. Inventions A, B and C are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention B has utility separate from that of inventions A and C such as providing a commodity auction system, and invention C has utility separate from that of invention A such as accessing customer database for targeted advertising. See MPEP § 806.05(d).
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, or patentability requirements, restriction for examination purposes as indicated is proper.
- 4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
